

Get DSL Like Speeds from a 56k Dial-up Line

If you're one of the millions of frustrated consumers who is tired of waiting for broadband service to be available in your area or your current service is just too slow, CNW Turbo™ is the product you've been waiting for...

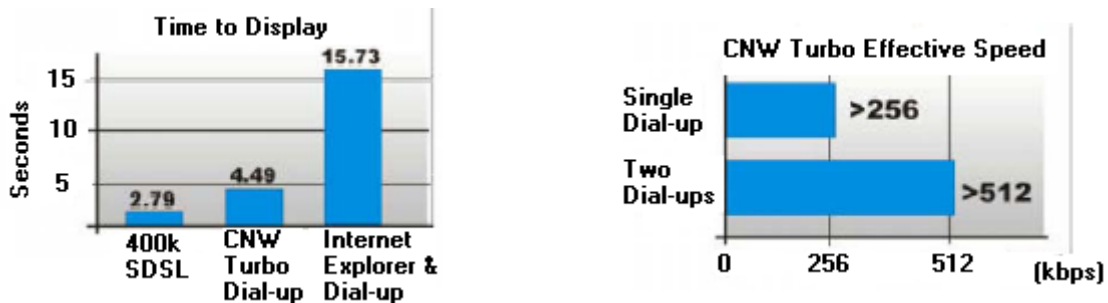

CNW Turbo is a new, innovative, patent-pending service that dramatically speeds up the delivery of web-based content over traditional dial-up telephone lines. With CNW Turbo, there'll be no more endless waiting for web pages to display or files to be downloaded. CNW Turbo makes traditional 56k dial-up connections perform at DSL speeds. The service also improves the speed of connections like Cable, DSL and Wireless. CNW Turbo can be run on a standalone PC or on a LAN of up to five users.

Speed Is Just a Click Away...

After installing CNW Turbo you'll notice an immediate speed increase, but the best is yet to come. The more you use CNW Turbo, the faster your Internet experience becomes. Over time, CNW Turbo's SmartHost™ feature learns your browsing habits and creates a custom profile just for you. This profile allows CNW Turbo to anticipate where you want to go and what you want to do there even before you do. This lets CNW Turbo deliver your frequently-visited sites lightning fast.

CNW Turbo Performance Data

CNW Turbo will turn your slow, frustrating Internet experience into an exhilarating ride.

Web browsing tests performed on a dial-up line connected at 45Kbps

Breakthrough Optimization Techniques Produce All the Speed You Need...

CNW Turbo's performance optimizations include:

- TCP/IP Protocol Optimization • Advanced Compression
- Interleaved Intelligent Caching • Optimizing Data Centers
- Window & Browser Optimizations • *and much more...*

TURBO _____ *Internet Access*

Security and Control...

Ultra-Secure Firewall • provides complete protection against hackers. With its stealth mode of operation, outsiders won't even know your computer is there, making it likely that they'll move on to an easier unprotected target.

Usage Accounting • lets you quickly see which web sites are being visited, by whom they are being visited and how much time is being spent there.

Site Blocking • puts you in control. You can quickly and easily create a list of acceptable sites that anyone can visit or, inversely, a list of sites that no one can visit.

Content Control • provides two additional layers of protection to keep users away from undesirable or unproductive Internet sites. Two standards are supported: the Platform for Internet Content Selection (PICS) and Voluntary Content Rating (VCR). These standards identify the type of content found in web pages and denies access to web pages that do not meet the criteria set by you.

Failsafe Downloads • automatically recovers dropped connections, allowing downloads to continue where they left off when the connection is restored.

Ad Blocking • stops annoying advertisements which waste valuable bandwidth and can significantly slow down web browsing.

Connection Teaming* • harnesses the bandwidth of multiple connections, providing you with the ability to create as much bandwidth as you need.

* 2 line and LAN Version only

Versions Available

- Single-user, single-line Residential
- Single-user, Road Warrior
- LAN, up to five users

Easy to Install

CNW Turbo's Installation Wizard walks you through the simple setup process. Along the way, it will automatically check your PC for memory, disk space, IP address and other required information. Your Internet connection will even be tested to insure a trouble-free installation.

Get It Now!

Call today at 800-452-9201 to get connected. CNW Turbo will turn your slow, frustrating Internet experience into an exhilarating ride--you'll wonder how you ever surfed without it!
